

Lecture Notes in Computer Science

The LNCS series reports state-of-the-art results in computer science research, development, and education, at a high level and in both printed and electronic form. Enjoying tight cooperation with the R&D community, with numerous individuals, as well as with prestigious organizations and societies, LNCS has grown into the most comprehensive computer science research forum available.

The scope of LNCS, including its subseries LNAI and LNBI, spans the whole range of computer science and information technology including interdisciplinary topics in a variety of application fields. The type of material published traditionally includes

- proceedings (published in time for the respective conference)
- post-proceedings (consisting of thoroughly revised final full papers)
- research monographs (which may be based on outstanding PhD work, research projects, technical reports, etc.)

More recently, several color-cover sublines have been added featuring, beyond a collection of papers, various added-value components; these sublines include

- tutorials (textbook-like monographs or collections of lectures given at advanced courses)
- state-of-the-art surveys (offering complete and mediated coverage of a topic)
- hot topics (introducing emergent topics to the broader community)

In parallel to the printed book, each new volume is published electronically in LNCS Online.

Detailed information on LNCS can be found at
www.springer.com/lncs

Proposals for publication should be sent to

Preface

We would like to welcome you to the proceedings of the workshops held in conjunction with the 27th International Conference on Conceptual Modeling (ER 2008). While the ER main conference covers a wide spectrum of conceptual modeling research, increasingly complex real-world problems demand new perspectives and active research in new applications. The ER workshops attempt to provide researchers, students, and industry professionals with a forum to present and discuss emerging hot topics related to conceptual modeling.

We received 13 excellent proposals for workshops to be held with ER 2008. We accepted the following seven based on peer reviews:

1. The Second International Workshop on Conceptual Modeling for Life Sciences Applications (CMLSAs 2008), organized by Yi-Ping Phoebe Chen and Sven Hartmann.
2. The 5th International Workshop on Evolution and Change in Data Management (ECDM 2008), organized by Fabio Grandi.
3. The 4th International Workshop on Foundations and Practices of UML (FP-UML 2008), organized by Juan Trujillo and Andreas L. Opdahl.
4. The First International Workshop on Modeling Mobile Applications and Services (M2AS 2008), organized by Fernando Ferri, Patrizia Grifoni, and Maria Chiara Caschera.
5. The Second International Workshop on Requirements, Intentions and Goals in Conceptual Modeling (RIGIM 2008), organized by Colette Rolland, Carson Woo, and Camille Salinesi.
6. The Second International Workshop on Semantic and Conceptual Issues in Geographic Information Systems (SeCoGIS 2008), organized by Esteban Zimányi and Christophe Claramunt.
7. The 5th International Workshop on Web Information Systems Modeling (WISM 2008), organized by Flavius Frasinca, Geert-Jan Houben, and Philippe Thiran.

These seven workshops received 18, 8, 12, 23, 15, 20, and 12 papers, respectively. Following the rule of the ER workshops, the respective workshop Program Committee carried out peer reviews and accepted 6, 3, 5, 9, 6, 9, and 5 papers, with acceptance rates of 33%, 38%, 42%, 39%, 45%, 40%, and 42%, respectively. In total, 108 workshop papers were received and 42 papers were accepted with the average acceptance rate of 39%.

We also had invited speakers and papers that significantly enhanced the perspectives and quality of the ER 2008 workshops. The four invited papers are:

1. CMLSAs 2008: Victor Maojo, "Ontologies in Practice: From Biomedical Informatics to Nanomedicine."
2. ECDM 2008: Carlo Zaniolo, "Time Versus Standards: A Tale of Temporal Databases."

3. FP-UML 2008: Yair Wand, "Using Object Concepts and UML for Conceptual Modeling."
4. WISM 2008: Hui Ma, Klaus-Dieter Schewe, Bernhard Thalheim, and Qing Wang, "Abstract State Services—A Theory of Web Services."

We thank the Organizing Chairs of the seven workshops. They invested an enormous amount of time and effort for the workshops, handling the paper submissions, organizing Program Committees, reviewing, selecting workshop papers, and collecting camera-ready copies for the workshops. Most of all, we would like to express our sincere appreciation to the authors who contributed their hard works as well as to the members of the Program Committees and external reviewers who ensured high-quality programs, resulting in this outstanding program. We are also indebted to the ER 2008 Organization Committee for their support in reviewing workshop proposals and scheduling workshops.

We hope all participants shared the recent advances in the emerging areas and found some opportunities and challenges in these new research areas in conceptual modeling.

Modeling

- Reflective Analysis of the Syntax and Semantics of the i* Framework . . . 249
Jennifer Horkoff, Golnaz Elahi, Samer Abdulhadi, and Eric Yu

- Modeling Strategic Alignment Using INSTAL 261
Laure-Hélène Thevenet

- Requirements Engineering for Distributed Development Using Software Agents 272

- Miriam Sayão, Aluizio Haendchen Filho, and
 Hércules Antonio do Prado*

Elicitation Issues

- Integrating Business Domain Ontologies with Early Requirements Modelling 282

- Federik Gailly, Sergio España, Geert Poels, and Oscar Pastor*

- Goal-Oriented Authoring Approach and Design of Learning Systems 292

- Valérie Emin, Jean-Philippe Perrin, and Viviane Guéraud*

- Timing Nonfunctional Requirements 302
Ivan J. Jureta and Stéphane Faulkner

**SeCoGIS 2008 – Second International Workshop
 on Semantic and Conceptual Issues in Geographic
 Information Systems**

- Preface to SeCoGIS 2008 312
Esteban Zimányi and Christophe Claramunt

Foundational Aspects

- Projective Relations on the Sphere 313
Eliseo Clementini

- Life and Motion Configurations: A Basis for Spatio-temporal Generalized Reasoning Model 323

- Pierre Hallot and Roland Billen*

- A Semantic and Language-Based Model of Landscape Scenes 334

- Jean-Marie Le Yaouanc, Éric Saux, and Christophe Claramunt*

Ontologies and Location-Based Services

- An Ontology-Based Approach for the Semantic Modelling and Reasoning on Trajectories 344

- Miriam Baglion, José Macedo, Chiara Renso, and
 Moníca Wachowicz*

- Administrative Units, an Ontological Perspective 354
*Francisco J. López-Pellicer, Aneta J. Florczyk, Javier Lacasta,
 Francisco Javier Zarazaga-Soria, and Pedro R. Muro-Medrano*

- A Modular Data Infrastructure for Location-Based Services 364
Shijun Yu and Stefano Spaccapietra

Interoperability and Spatial Infrastructures

- A Method to Derivate SOAP Interfaces and WSDL Metadata from the OGC Web Processing Service Mandatory Interfaces 375

- Gonzalo Sancho-Jiménez, Rubén Béjar, M.A. Labre, and
 Pedro R. Muro-Medrano*

- Managing Sensor Data on Urban Traffic 385
*Claudia Bauer Medeiros, Marc Joliveau, Geneviève Jomier, and
 Florian De Vuyst*

- Retrieving Documents with Geographic References Using a Spatial Index Structure Based on Ontologies 395

- Miguel R. Luaces, Angeles S. Places, Francisco J. Rodríguez, and
 Diego Seco*

**WISM 2008 – Fifth International Workshop on Web
 Information Systems Modeling**

- Preface to WISM 2008 405
Flavius Frasinca, Geert-Jan Houben, and Philippe Thiran

Web Information Systems

- Abstract State Services: A Theory of Web Services 406
Hui Ma, Klaus-Dieter Schewe, Bernhard Thalheim, and Qing Wang

- A Meta-model Approach to the Management of Hypertexts in Web Information Systems 416

- Roberto De Virgilio and Riccardo Tortone*

- An Approach to Creating Design Methods for the Implementation of Product Software: The Case of Web Information Systems 426

- Lutzten Luinenburg, Slinger Jansen, Jurriaan Souer,
 Sjaak Brinkkemper, and Inge van de Weerd*

Semantic Web Information Systems

- Semantic Verification of Web System Contents 437
María Alpuente, Michele Baggi, Demis Ballis, and Moreno Falaschi

Identifying Users Stereotypes with Semantic Web Mining 447
Sandro José Rigo and José Palazzo Moreira de Oliveira

On Temporal Cardinality in the Context of the TOWL Language 457
Violet Milea, Michael Mrissa, Kees van der Sloijs, and Uzay Kaymak

Author Index 467
